### Product description

Designed for automatic car wash applications, this shampoo boasts excellent foaming properties. It can be used as an active foam or as a shampoo.

### Storage

Keep tightly closed, avoiding exposure to UV rays and extreme temperatures. For more information, we recommend referring to the safety sheet.

### Directions for use

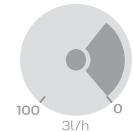

Product designed for:

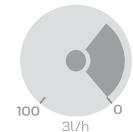

A dosing pump is used to apply the product in high-pressure Jet washes. The recommended dosing rate for hard water (400 ppm) is around 20 mL/min, trying to keep the pump at a percentage of between 25 and 30%.

The flow of chemical product can be reduced slightly to around 18 mL/min when using soft water.

In car wash tunnels and rollovers, the product is applied by means of a dosing pump. For hard water (400ppm), dosing is recommended around 25 mL/min, trying to keep the percentage of the pump between 25-30%. The flow of chemical product can be reduced slightly to around 20 mL/min when using soft water. We recommend doses of 25 mL/min for commercial vehicles.
