### Product description

Highly concentrated two-in-one shampoo used in the first phase of the car wash process. Removes insects and bird droppings from the chassis of the vehicle and also serves as an effective wheel cleaner.

### Storage

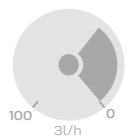

Keep tightly closed and avoid exposure to UV rays at extreme temperatures. For further information we recommend reading the safety sheet.

### Directions for use

Product designed for:

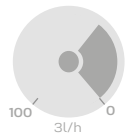

The average chemical dosage is 15 g/L. The product is applied by means of a dosing pump. Dosage is recommended around 35-45 mL/wash, to be adjusted in the facility according to the wash machine, water quality and time of year.

30-35%  
High-pressure pump

For manual application, we recommend using concentrations of between 10% and 20% depending on the amount of dirt to be eliminated. Allow the product to work for a maximum of 3 minutes before rinsing at high pressure or using brushes with water. Important: never allow the chemical product to dry onto the chassis. Do not spray onto very hot or matte surfaces without moistening them first, and make sure the vehicle is not exposed to sunlight during application.

35-40%  
PyT Pump
